

Geography

■ Remarkable Curriculum ■

Ambition

- We aim to promote the importance of geography as a discipline that enables pupils to recognise, describe, explain and evaluate the interactions between people and the environment.
- We are ambitious to promote the central role geography plays in supporting students to become global citizens and “agents of change” in the 21st century.
- We aim to inspire, challenge and support all learners through an ambitious, engaging and varied sequence of learning.

Commitment

- We are committed to stimulating interest, enjoyment and as sense of wonder about the world’s places and environments.
- We encourage an understanding of the role of scale from local to global, developing a sense of place so students build on their own experiences and make sense of the dynamically changing world around them.
- We incorporate an active enquiring approach to investigation such that students become confident learning inside and outside the classroom.
- Enhance students use of a range of geographical skills through both fieldwork and applied classwork.

Pride

- We are proud to promote an inclusive, diverse and contemporary curriculum.
- We are proud to promote environmental sustainability and develop students’ understanding of this.
- We are proud to develop cultural capital through field work and an enquiry-based curriculum.
- We are proud to promote an understanding of the physical and human process and interconnections of geography.
